Brock Maintenance, Inc. Receives ABC's Prestigious National Excellence Awards in Honolulu, Hawaii

Congratulations to Brock Maintenance, Inc. (BMI) for the National Award Recognition received last week at the 14th Annual Associated Builders & Contractors (ABC) National Convention in Honolulu, Hawaii. BMI received "two" prestigious Associated Builders & Contractors "Excellence in Construction Eagle Awards".

"Excellence in Construction Awards"

*Approximately 1,500 ABC members and convention attendees witnessed this impressive award ceremony. The Excellence in Construction (EIC) award recognizes companies that performed services on a special, note worthy project. Two projects were submitted for the competition with both projects receiving national honors. BMI successfully provided all of the scaffolding, painting and insulation services for the "2003 Valero Ardmore, Oklahoma Refinery Plant-Wide Turnaround Project" winning the **Other Specialty Construction** category award. This project presented tremendous challenges utilizing BMI's multi-crafting skills while working in highly congested units of the facility. BMI also successfully provided the painting services for the "ExxonMobil Baytown, Texas Low Sulfur Mogas Project" winning the **Industrial-Under \$2 Million** category award. BMI was challenged with performing painting services on the largest hydrofiner in the world as it was being constructed. This work was done while working around a peak load of 1,400 other craft personnel and staff.*

BMI was selected out of a group of over 300 national level contractor submittals. ABC presented 43 eagle awards at the national convention in Honolulu. 5 of those awards were presented to the Greater Houston Area Chapter members with BMI receiving 2 of these 5 awards. Jeff Davis, BMI President, stated to a large contingency of BMI participants attending the convention "I am extremely proud of those who contributed to this award success and express my appreciation for doing an outstanding job regarding both winning projects". Todd Brock, COO of the Brock Group, also congratulated the BMI TEAM at the convention during a celebration dinner.

*In order to qualify for the national award opportunity, BMI had to first win at the local ABC chapter level. BMI accomplished the local level wins in Houston at the **ABC 2003 ICE Award Ceremony** in October of 2003. Many thanks go out to **Valero Ardmore, ExxonMobil Baytown & Fluor Corporation** for their support and encouragement on these projects. BMI is the only Specialty Industrial Contractor (SIC 17) to ever win two eagle awards in the same year.*

*BMI also received local & national level EIC ABC award recognition in year 2000 for the **Historical Price Tower Scaffold** project in Bartlesville, Oklahoma and in 2002 for the **No. 1 Coker Course Replacement Project** at the BP Carson Refinery in California. **ABC Safety Excellence Awards** were also presented to BMI at the national conventions in 2000 & 2002.*

Congratulations are extended to all Brock Maintenance, Inc. employees and to the two projects for this remarkable achievement.
