OUR SERVICES
In these unprecedented times, Brock is working with customers to provide a trusted, single-source solution to support their facilities. Our multi-craft approach enables us to perform a variety of services enabling customers to combine contracts and reduce exposure to numerous crews. We have also instituted company-wide return-to-work safety procedures at all locations, to ensure the well-being of our crews and others around us.

Scaffolding
Brock has significant experience with OSHA compliant scaffold engineering, design, erection and dismantle. A diverse inventory of mobile and stationary systems enables our scaffold teams to respond immediately to client needs.

Coatings/Linings
As a leader in the development and management of industrial coatings solutions, Brock combines technical expertise with practical skills, providing high quality surface preparation and coatings for structural steel, vessels and tanks, equipment and other facility assets.

Fireproofing
Brock provides high performance fire protection systems tailored to fit specific project requirements and designed to minimize the escalation of fire from the failure of structural supports or overheating of pressure vessels and similar equipment.

Facilities Maintenance/Roads & Grounds
Brock offers a full range of industrial services related to facilities maintenance including concrete, carpentry, roads and grounds and landscape solutions, while ensuring continuous improvement and best value for our customer.

Lead & Asbestos Abatement
Operating in accordance with EPA and OSHA regulations, Brock’s process is designed to minimize inconvenience while fully isolating the area. Brock will then safely test, remove, and dispose of lead & asbestos.

Insulation
Brock’s industrial insulation expertise helps facilities operate at maximum efficiency while reducing risks and costly repairs. Our capabilities include installation in support of large-scale capital construction projects, energy efficiency studies, maintenance and repair.

Janitorial
Brock provides expert industrial cleaning and janitorial services, tailored to fit the needs of each customer. Brock offers a full range of janitorial solutions, while ensuring continuous improvement and best value for our customers.

Roofing
Brock is a fully qualified applicator of virtually all roofing systems, including EPDM, thermoplastic, built-up, modified bitumen, asphalt and metal. Services include new construction, re-roofing, maintenance and repairs, and roof inspection.

Siding
Brock provides some of the leading siding services in New England. Siding is used to surface the exterior of a building to protect against exposure to the elements, prevent heat loss, and visually unify the facade.

Millwright
Brock’s millwright services include installation, maintenance, dismantling, and reassembling. We can also move machinery as needed. Our teams can perform machine repairs, modifications, and precision alignment in order to keep your facilities running.
